

Tanks for liquid fertilizers

SWIMER AGRO TANK

22000L RSM[®]
by Swimer

SWIMER AGRO TANK

Excellent quality SWIMER AGRO TANK stationary tanks are adapted for storing liquid fertilizers. Thanks to the carrying handles, they are easy to transport and unload. They are made of the highest quality raw materials, have high resistance to external influences, are resistant to UV radiation, do not fade and do not corrode.

High chemical and mechanical resistance and ease of cleaning ensure long-term and comfortable use.

Single-walled tanks are available in capacities: 1500, 2500, 3500, 5000, 7500, 10000, 12500, 15000, 20000 and 22000 liters.

Double-walled tanks come in capacities of: 1500, 2500, 3500, 5000, 7500, 10000 liters.

EQUIPMENT DESCRIPTION

SWIMER AGRO TANK

BASIC:

Inspection hatch*

An inspection hatch in the inner tank allows:

- ◆ access to the inside of the tank
- ◆ comfortable the inside of the tank inspection
- ◆ easy tank cleaning

* Inspection hatch size depends on tank capacity

2" filling pipe with a STORZ type connector on top of the tank

- ◆ tight and fast connection between the cistern the tank
- ◆ minimizing the risk of leakage when filling the tank
- ◆ less loss of refuelled liquid

Vent

- ◆ provides a permanent connection to the atmosphere
- ◆ prevents the formation of over- and under-pressure in the tank

2" bottom drain with ball valve and connector STORZ type

- ◆ located at the bottom of the tank
- ◆ no need to use a ladder
- ◆ safety - valve allows you to control the filling of the liquid
- ◆ tight and quick connection of the refuelled sprayer with the tank

OPTIONS:

Submersible pump 230 V, 100 - 500 L /min

- ◆ top-of-the-line pump enables high efficiency

4 or 6 meter suction delivery hose terminated with a STORZ-type connector

- ◆ convenient connection of the sprayer to the pump mounted in the tank, which allows you to for trouble-free refueling of the sprayer

Emergency power switch

- ◆ possibility of quick and safe power off
- ◆ in case of power failure, the device is switched on again only after the green button is pressed manually
- ◆ compliant with the Machinery Directive

Filling line inside the cabinet terminated with a STORZ-type connector*

- ◆ convenient and safe pouring of liquid into the tank - no need to use a ladder
- ◆ tight connection with the tank during refueling
- ◆ minimized risk of leakage

* In capacities of 7500, 10000, 12500, 15000, 20000, 22000 liters
